FIDELIS IZEBIAFE AFIMIA

SENIOR SOFTWARE ENGINEER

Nigeria | Afimiafidelis95@gmail.com

GitHub | LinkedIn | Portfolio

Professional Summary

Senior Engineer at Leoserve with product leadership and frontend architecture experience. Led Leoserve/Digiverse, a customer platform for product enquiries, payments, and progress tracking, and planned the frontend structure for Ameen Hospitality's administration product. Combines software delivery experience with code reviews, technical documentation, and developer mentoring. Technical background includes JavaScript, TypeScript, React, and backend project work in Ruby on Rails and PostgreSQL.

Technical Skills

Languages and frontend: JavaScript, TypeScript, React, Redux, HTML5, CSS3
Backend project experience: Ruby, Ruby on Rails, PostgreSQL, Active Record
Tools: Git, GitHub, Vercel, Chrome DevTools
Engineering: Collaborative architecture design, responsive development, code reviews, technical documentation, Agile delivery, mentoring

Professional Experience

Leoserve | October 2024 - Present

Senior Engineer

- Led the Leoserve/Digiverse product, enabling customers to submit product enquiries, make payments, and track progress on their products.
- Planned and structured the frontend architecture for Ameen Hospitality's administration product as part of the development team.
- Collaborate with engineering teammates on product planning and software architecture design.

NAITASK | February 2023 - September 2024

Developer Intern | On-site

- Developed, tested, deployed, and maintained JavaScript and React software within a collaborative engineering team.
- Clarified requirements and user needs with cross-functional teams, communicating technical concepts to technical and non-technical stakeholders.

Microverse | April 2023 - March 2024

Volunteer Mentor / Junior Developer Intern | Remote

- Mentored junior developers through code reviews and technical guidance, recommending improvements to code organization and quality.
- Created and maintained technical documentation for codebases, APIs, and project components.

Middey Technology | March 2022 - October 2022

Developer Intern | Hybrid

- Coordinated development work with teammates through daily stand-ups and sprint planning, working toward agreed deadlines and deliverables.

Selected Projects

Product leadership and architecture contributions:

Leoserve / Digiverse | leoserve.com

- Led a customer platform bringing product enquiries, payments, and progress tracking into one product.

Ameen Hospitality Admin | ameenhospitality.com

- Planned and structured the frontend within a team building the hospitality administration product.

Additional product contributions:

- Tilhomes | tilhomes.com
- Exergie Group | exergiegroup.com
- Leoserve DHR administration application.

Solo Blog | Public GitHub project

Backend project | Ruby on Rails and PostgreSQL

- Rails application with users, posts, comments, and likes, backed by a relational schema with indexes and foreign keys.
- Uses Active Record relationships and model validation to connect application data and validate post content, with queries for recent comments.
